mPower Keys to Success:

- Effective recruiting
- In-depth internal training
- Extensive geographic reach
- High employee retention
- Comprehensive screening

The right resources, right away.

As your business grows, so too does your need for professional IT support. **mPower** can provide the most highly qualified resources based on your specific technology requirements.

Technical Recruiting

mPower will work closely with you to identify your IT requirements, then present carefully screened candidates who meet or exceed those requirements. Every candidate undergoes in-depth technical aptitude evaluations, background checks, and drug testing to ensure he or she is qualified to address your needs.

Project Staffing

mPower can help augment your IT staff by locating hard-to-find skill sets and assembling specialized teams. Resources are drawn from a highly diverse and screened pool of IT professionals based on the specific technology expertise required for a given project.

Customized Engagements

mPower provides a flexible approach to staffing with right-to-hire, temp-to-perm, fixed price, time and materials, and not-to-exceed pricing terms available.
