Introduction

This Service Description Document (“SDD”) sets forth the terms of the mPower Advance Proof of Concept (POC) Discovery Service (“Service”). The Service provides Customer IT Asset discovery and normalization, as well as a look into the key features and functionality of mPower’s Advance service and toolset.

This Service enables The Customer to leverage mPower’s expertise in IT Asset Standardization to help verify and validate key elements of a preliminary or conceptual solution, thereby reducing deployment risks by highlighting potential technical issues and limitations at an early stage.

The mPower Advance Proof of Concept enables the customer to participate in a real-world experience of an mPower Standardized solution before purchasing the service. Our experts implement the mPower solution using your actual information in our secure POC environment (not a full-scale implementation).

Service Features and Deliverables

The key Deliverable of Proof of Concept Testring Service consists of:

1. Enterprise Level Findings Report – This is a report that plays back the information gathered and processed in an executive brief format. It contains text, charts and graphics to show what is currently in the client’s environment. It will highlight the findings and demonstrate opportunities for improvement. For an example of this report, see document: SampleDiscoveryFinding.doc
2. A Presentation and Standardized playback of details on 10% of the assets, up to 1000. A randomly selected 10% of the assets will be loaded into mPower’s Advance tool. mPower will provide a presentation of the findings as well as show the client the detail of the 10% selected through our Advance tool. We will demonstrate the details available, reporting available and the overall process enablement that our tool provides. The demonstration could result in reports and spreadsheets being created and provided to the client. This presentation has not yet been developed.

POC Execution

mPower will execute the mPower Advance Proof of Concept by processing the data provided and approved by the Customer. This will include extracting the required data, normalizing the asset information then rationalizing the information within mPower’s Advance toolset.

Proof of Concept Findings Report

After the POC execution is completed, mPower will analyze the results and prepare a findings test report that states the findings and recommendations based on these results.

Proof of Concept Findings Report

Customer details in Advance

Proposal for full discovery and additional service offerings

mPower will provide a detailed proposal to “right-size” the work and effort needed to complete a full customer discovery and for the appropriate service offering for moving forward.

Neither party shall be liable to the other party to the extent that such other party has incurred any liability to a third party as a result of its own material breach of this Agreement, negligence or intentional misconduct. The obligations of each party to provide indemnification hereunder are contingent upon the indemnified party: (i) promptly notifying the indemnifying party in writing of any claim; (ii) giving the indemnifying party sole control over the defense and settlement of the claim, provided that any settlement contains the full release of the indemnified party; and (iii) reasonably cooperating in defense and settlement efforts.

Notwithstanding any other provisions no liability of mPower shall arise for failure to provide the System if due to any cause beyond mPower's reasonable control.
4. No action arising out of this Agreement, regardless of form, may be brought by either party or any third party more than two (2) years after the date the cause of action accrued.
5. Reservation of Rights. mPower reserves all rights not expressly granted herein. Except as set forth in this Agreement, and except for 3rd party software that is licensed under third party licenses, no express or implied license or right of any kind is granted to Client regarding the System and Client covenants not to know, use, produce, receive, reproduce, copy, market, sell, distribute, transfer, translate, modify, adapt, disassemble, decompile or reverse engineer the System or any software comprised in the System, or to create derivative works based on, or obtain possession of any source code of, or technological material relating to, the System or any portion thereof; provided that this provision does not apply to

In the event of a conflict between this Agreement and any other written and signed agreement, the agreement that is signed in original ink form shall control over this Agreement. Any waiver or modification of this Agreement will not be effective unless made in writing and signed by the authorized representatives of the parties. In the event of any direct conflict between the terms and conditions of this Agreement and any document referenced herein or any Exhibit, the terms of this Agreement shall control.
7. Force Majeure. If either party's performance of this Agreement, other than the payment of monies, is prevented, restricted or interfered with by reason of Force Majeure, such party shall, upon giving prior written notice to the other party, be excused from performance to the extent of the Force Majeure, provided that the party so affected shall use its best efforts to avoid or remove the causes of Force Majeure, and shall continue performance hereunder with the utmost dispatch whenever the Force Majeure is removed. Notwithstanding the foregoing, if the Force Majeure continues for a period of one hundred eighty (180) calendar days or more, the unaffected party may, on written notice to the party affected, terminate this Agreement, and neither party shall have any further obligation to the other save for payment of all monies due and payable and for those provisions hereunder which survive termination of this Agreement.
